Board of Trustees Meeting of June 15, 2016 Information Technology Report

There isn't much to report from the Information Technology Department since our May meeting, just updates on a couple items that were in my May report.

➤ **ISO and WC Navigator**

We went through our first test data feed and claim scoring process with ISO last week. Based on the results of the first run through we adjusted the data elements and what is being used to score our claims. We have also requested some additional features to be added to the dashboards and reporting features provided by ISO. We have a meeting scheduled with ISO in the next two weeks where we should have the final product delivered. The Claims Supervisors and Management staff will be trained, the product will be tested for a few weeks, and if we are satisfied with everything, I will sign off on the acceptance of product.

➤ **Claims Management Systems Search**

I am developing an RFP for the claims management software, once this is complete, the RFP will be posted on our website and available for vendors to submit their bids.
